

AI-Powered Cyber Attack Command

Real-time AI-driven SOC with autonomous threat detection, anomaly scoring, and MCP-powered response automation. This dashboard simulates an intelligent security operations center capable of detecting, explaining, and responding to cyber threats in real time.

Time Ran...

All time (real-time)

Live AI Threat Status

Real-time alert generated by AI when a high-risk attack is detected.

SYSTEM STABLE

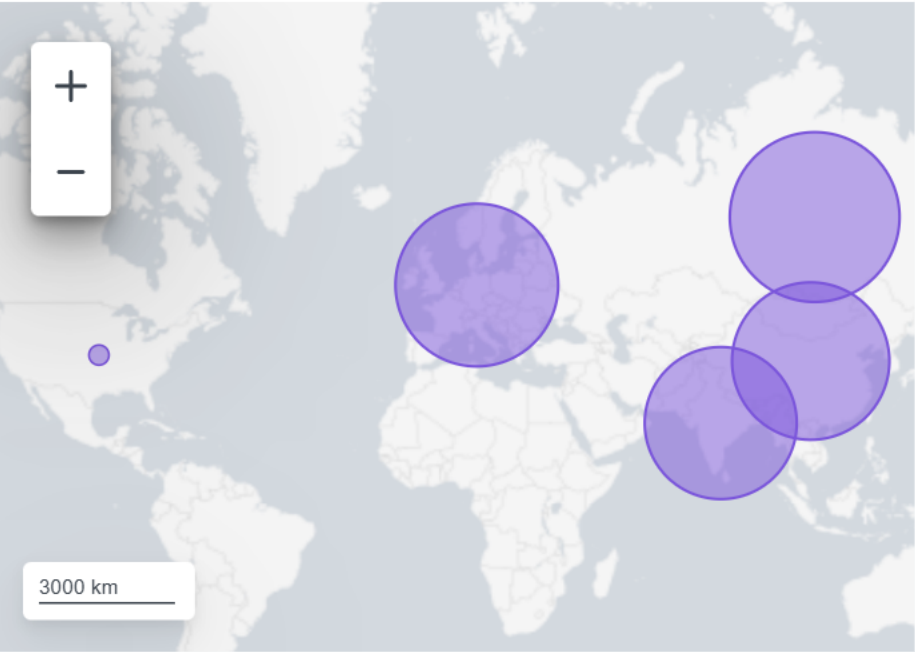

Max Threat Level

Highest risk score observed in the selected time window.

100

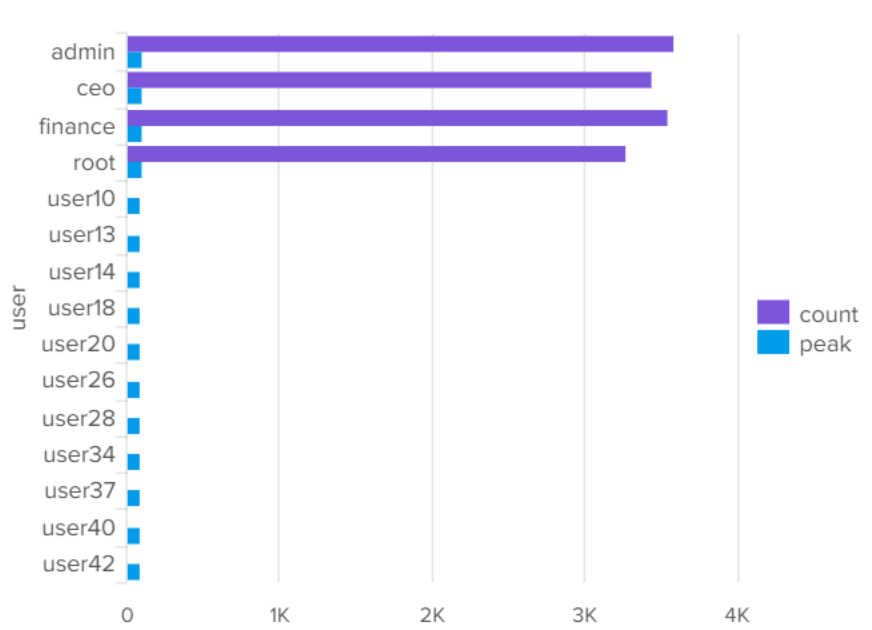

Global Attack Surface

Geographic distribution of detected threats based on attacker origin.

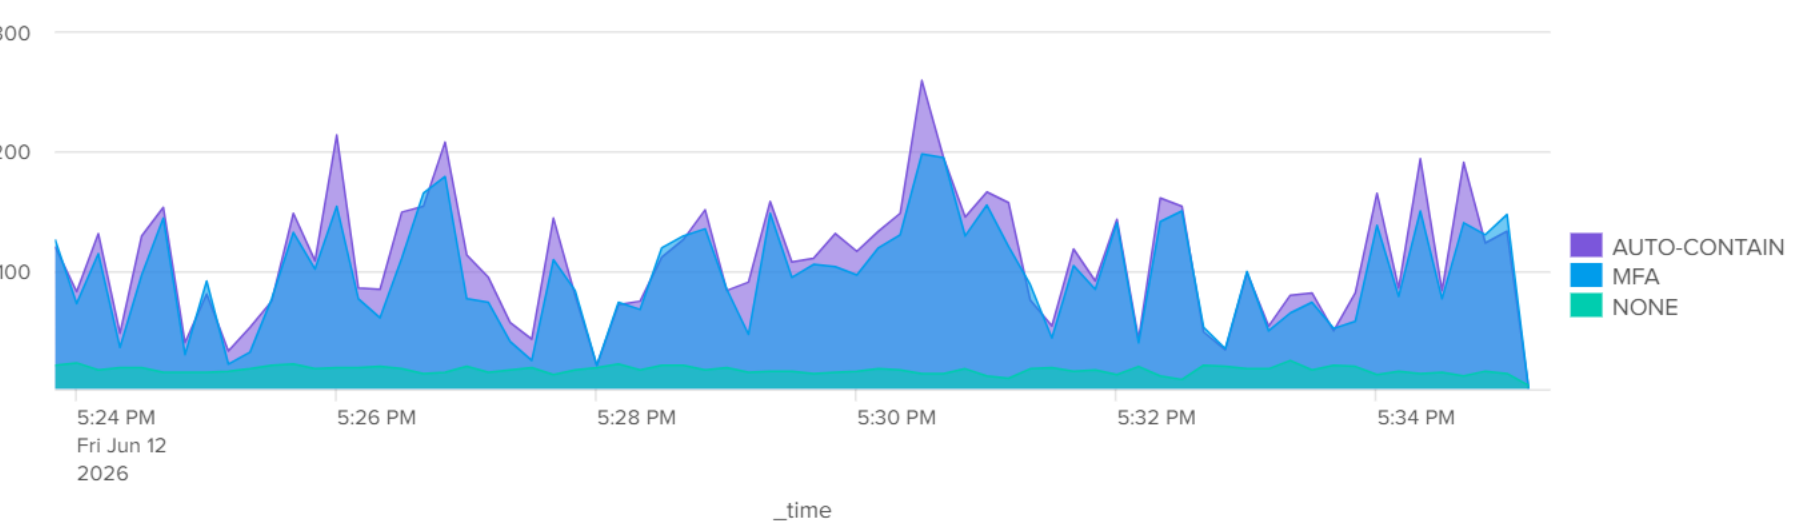

Top Active Threat Targets

Top 15 users/accounts most targeted by high-risk activity.

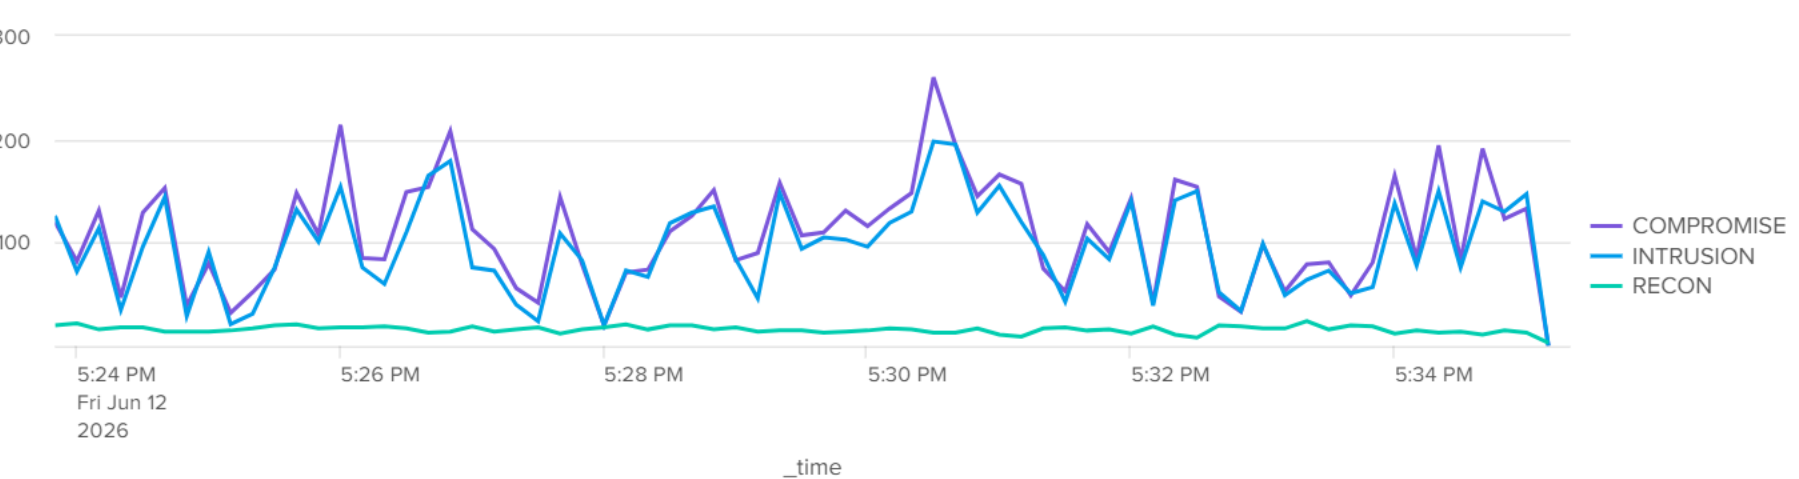

AI Actions Executed Over Time

Tracks automated AI responses such as MFA triggers and account containment.

Attack Timeline

Evolution of attack stages over time from reconnaissance to compromise.

Live Threat Feed

Raw incoming security events being processed by the AI engine.
